MANIBHARATHI ILA

UI UX DESIGNER & PHP DEVELOPER

LinkedIn.com| GithHub.com| Portfolio | +91 9688893217 |ilabharathiuiuxdesigner@gmail.com

OBJECTIVE

Highly experienced in creating beginning web concepts utilizing wire frames and quick to high-fidelity prototypes, employing technology, user-centered design, and business strategy. Safeguard design and **UI/UX** standards across all platforms. Drive intuitive and innovative solutions within technical limitations, platform capabilities, and constraints. Thrives in collaborative environments, working alongside business owners, vendors, clients, developers, and other stakeholders.

WORK EXPERIENCE

Designation: PHP Trainee & UI UX Designer, **Gtek Techno Solutions, Experience**: 1 Year

- Proficient in front-end technologies like HTML, CSS, Bootstrap, and JavaScript.

- An in-depth knowledge Web Designer, or Web Applications Designer, is responsible for designing the overall layout and aesthetic for websites.

UI UX DESIGNER

- Figma, Sketch, Balsamiq, Adobe Photoshop, Adobe XD

DIGITAL MARKETING

- SEO
- Google Analytics
- Email Marketing
- Social Media Marketing
- Google Ads
- Facebook Ads
- Pay-per-click advertising
- Keyword Research
- Search engine marketing

TTECHNICAL SKILL

- Mobile Design
- Color theory
- Graphic Design
- Responsive and Adaptive Design
- Cross-browser compatibility
- Web Optimisation

ROLES & RESPONSIBILITIES

- ✓ Designing UI for mobile applications (Android + iOS) and web applications.
- ✓ Crafting the visual elements of a product, including layout, colour schemes, and interactive elements.
- ✓ Figma Expertise: Develop wireframes and prototypes using Figma.
- ✓ Created my responsive design that adapts to multiple screen sizes (mobile, tablet, desktop).
- ✓ Created responsive, user-friendly UI/UX designs with HTML, CSS, JavaScript, and modern frameworks.
- ✓ Experience in Proficiency in design tools such as Figma, Adobe XD, or Sketch.
- ✓ Creating high-quality UI that showcases how the system works, covering all positive and negative scenarios.
- ✓ My status: Staying up-to-date on the latest trends in UI/UX design.
- ✓ will be sure to collaborate closely with product managers, developers, and other stakeholders to understand project requirements and goals.
- ✓ SEO, content marketing, email marketing, and social media marketing (SMM)
- ✓ Execute and manage digital marketing campaigns on Google Ads and Facebook Ads platforms. I will do my best.
- ✓ Monitor and analyze website traffic and engagement metrics.
- ✓ Conduct market research to identify new growth opportunities.
- ✓ Create and optimize content for websites, blogs, social media, and digital advertising campaigns.
- ✓ Manage SEO efforts, including keyword research, on-page and off-page optimization, and technical SEO.
- ✓ Research keyword trends.
- ✓ Research and implement search engine optimization recommendations.
- ✓ Front-end Technologies: Basic knowledge of front-end technologies, such as JavaScript, HTML5, and CSS3.
- ✓ Crafting the visual elements of a product, including layout, colour schemes, and interactive elements.
- ✓ Strong communication skills and a positive collaborative mindset.
- ✓ Maintain the design and ownership of the developed designs.

- ✓ Recommend changes to website architecture, content, linking, and other factors to improve SEO positions for target keywords.

- ✓ Optimize copy and landing pages for search engine marketing.

- ✓ Research and analyze competitor advertising links.

- ✓ Work with the development team to ensure SEO best practices are properly implemented on newly developed code.

- ✓ Collaborate with designers to translate UI/UX wireframes into high-quality code.

- ✓ I collaborate with cross-functional teams, including Full Stack Developers.

- ✓ Planning and designing user interfaces for Web applications using tools like Figma, Sketch, or Adobe XD.

- ✓ Ensured that the user interface is consistent with the overall brand guidelines.

- ✓ My team and I contribute to and proactively seek solutions to technical or design challenges.

- ✓ UI/UX design for website.

- ✓ Graphic design for Social Media.

- ✓ Mobile responsive wire frames.

- ✓ Write clean, efficient, well-documented code.

- ✓ Provided innovative ideas.

- ✓ Passion for problem-solving.

- ✓ Ability to work in an agile and customer-centric team.

- ✓ Open to learning new technologies.

- ✓ As a front-end developer, I took the responsibility, which included defining software requirements, writing clean and efficient code for various applications, and running tests to improve system functionality.

- ✓ Good team player and communication skills.

- ✓ Collaborate with product owners and designers to gather requirements and create technical specifications.

- ✓ Attend design and business strategy meetings and presentations.

- ✓ Menus, tabs, and widgets are examples of graphic user interface elements

PROJECT

Project 1: S Infotech

Designation: PHP Trainee

Project Duration: 4 Months

Roles: Software Developer

Team Members: 6

Client Name: Duraiarasan K

Language: PHP

Tools: Visual Studio Code

Description: The S Info tech System is a PHP-based web application designed to streamline the operations of an IT service company. The system handles client management, project tracking, service requests, and billing, ensuring efficient workflows and improved client satisfaction. Modules: Add Client, Edit Client, Delete Client, View Clients, Add Project, Edit Project, Delete Project, View Projects, Manage Services, Billing, and Generate Reports.

Hard Skills

- Proficiency in PHP syntax, functions, and framework
- HTML, CSS, and JavaScript for creating user interfaces.
- Knowledge of front-end frameworks like Bootstrap.
- Proficiency in Git for version control and collaboration
- Optimising PHP code and database queries for faster load times.
- Familiarity with web servers an Apache).

Soft Skills

- Problem-Solving
- Communication
- Time Management
- Team Collaboration
- Customer Focus
- Critical Thinking
- Patience and Persistence
- Continuous Learning and Self-Improvement
- Emotional Intelligence and Stress Management

Roles & Responsibilities:

- ✓ Strong experience in PHP development with any of the PHP frameworks
- ✓ Hands-on experience in HTML, CSS
- ✓ Hands-on and strong experience in JavaScript
- ✓ Write clean, well-documented, and reusable code following best practices.
- ✓ Developed, maintained, and enhanced back-end services and applications using PHP.
- ✓ Collaborated with front-end developers to integrate user- facing elements with server-side logic.
- ✓ Developed code according to project requirements.
- ✓ Raised queries and seek their resolution from various stakeholders
- ✓ Analyzing requirements, problems, and solving them with the best solution
- ✓ Developed software to predefined standards and specifications.
- ✓ Integration of user-facing elements developed by front-end developers
- ✓ Build efficient, testable, and reusable PHP modules
- ✓ Solve complex performance problems and architectural challenges
- ✓ Seamless working with the UI/UX team
- ✓ Code deployment to live environment

Achievements:

- ✓ Simplified client data management with features for adding, editing, deleting, and viewing client profiles.
- ✓ Improved customer interactions by providing quick access to accurate information, reducing administrative burdens, and ensuring better communication.
- ✓ Advanced project management capabilities for adding, editing, deleting, and tracking projects.
- ✓ Simplified the management of service requests for faster client response and resolution.
- ✓ Integrated automated billing and invoicing features.
- ✓ Reduced billing errors, streamlined invoicing, and ensured timely payments, contributing to stronger cash flow and improved client trust.

Project 2: Sudhan Global Mobiles

Designation: UI UX Designer

Project Duration: 8 weeks

Tools: Figma and Balsamiq

Team Members: 6

Client Name: Thiliban

Description: Developed an e-commerce site for Sudhan Global Mobiles on Figma with emphasis on user-friendly experience and sleek UI. Developed wireframes, prototypes, and hi-fi mockups of responsive designs. Handoff with developers through Figma and Balsamiq to enable correct implementation. Completed the project in 8 weeks, improving usability and minimizing checkout time.

UI designer hard skills

- Knowledge of typography
- Use of design systems and style guides
- Designing for accessibility
- Layout and spacing
- Color theory
- Use of design systems and style guides
- Responsive and mobile design principles
- Graphic design
- Basic Front-end Knowledge
- HTML, CSS, understanding of grid systems

Soft skills for UI and UX designers

- Collaboration and teamwork
- Working with developers, product managers, and other stakeholders
- Cross-functional communication and collaboration
- Empathy
- Problem-solving
- Analytics
- Designing unique, user-friendly shopping experiences
- Communication
    - Explaining design decisions clearly to stakeholders & developers

Roles & Responsibilities:

- ✓ Worked closely with developers, product managers, and stakeholders to translate business needs into UX solutions.
- ✓ Focused on scalable, data-driven, and user-centered designs for the website.
- ✓ Basic understanding of front-end technologies (HTML, CSS, JavaScript) to collaborate effectively with developers.
- ✓ Demonstrated ability to design effective micro-interactions and prototypes using Figma.
- ✓ Developed wireframes, user flows, prototypes, and high-fidelity visuals that embody strong UX principles and visual clarity.
- ✓ Developed and executed comprehensive design strategies for web and mobile e-commerce platforms, ensuring seamless user journeys.
- ✓ Analysed user research, data, and business requirements to craft elegant, usable experiences that drive growth and revenue.
- ✓ Conducted usability testing to validate design decisions, identify areas for improvement, and inform future design directions.
- ✓ Optimizing the website for maximum speed, scalability, SEO, and responsiveness.

Achievements:

- ✓ Implemented larger buttons, swipe interactions, and easy tap targets for better mobile usability.
- ✓ High-quality product images are part of e-commerce essentials.
- ✓ A responsive e-commerce web design has these key characteristics: 1. Adjusting screen resolution 2. Automatically adjusting images 3. Custom and flexible layout structures.
- ✓ Implemented modern UI design principles, including consistent typography, colour systems, and grid layouts to enhance visual appeal.
- ✓ Implemented pixel-perfect, responsive eCommerce UI from Figma designs using HTML, CSS, JavaScript, and modern frameworks.

ADDITIONAL PROJECT

Project 2: Pizza Point

Designation: UI UX Designer

Roles: Website Designer

Tools: Figma

Description:

Designed an application for customers to order pizza at Pizza Point.

- o Customers can easily place pizza orders through the website.
- o Browse and choose from a variety of pizzas available on the menu.
- o To Customers paying cash or by card, directly to the delivery driver upon arrival.
- o The website works on all devices (computer, phone, and tablet)

Hard Skills

- Visual and UI Design Skills

UI design focuses on the visual elements of product interfaces and includes everything from color palettes and typography to fine-tuning the layout and overall aesthetic.

· User Research and Analysis

User research includes gathering data through user interviews, surveys, and other methods. It also involves analyzing this data to identify trends or patterns in user behavior.

· Wire framing
· Prototyping
· UX writing

The way designers choose to phrase error messages, app instructions, onboarding pages, calls to action, and captions will determine how easy it is for consumers to navigate the interface and how likely they are to continue using it.

Soft Skills

· Empathy

· Critical Thinking

· Time Management

Technical Contributions

✓ Created and developed wire frames, prototypes, and high-fidelity mock-ups using tools like Figma and Balsamiq.

✓ Created Design intuitive and visually appealing user interfaces for web and mobile applications.

✓ I ensured consistent design language and adherence to brand guidelines across all digital platforms.

✓ To ensure this project stays up to modern trends, tools on the latest UI/UX are designed.

✓ Responsive, mobile-friendly, and SEO-optimized web design.

✓ Designed visually compelling graphics for marketing, branding, and digital platforms.

Project 3: Eat more

Designation: UI UX Designer

Roles: Mobile App Designer

Tools: Figma

Description:

- Designed a mobile application for customers to order pizza, burgers, and salad at Eat More.

- Allow customers to order pizza, burgers, and salad
- Allow customers to choose foods from the menu
- App to send an email to the restaurant
- To keep things simple. The customer pays the delivery driver.
- The App works on devices (phone and tablet)

Hard Skills

- Use tools like **Figma** and **Balsamiq** to create wire frames, mock-ups, and interactive prototypes.

- Implement key design principles such as color theory, typography, and visual hierarchy.

- Ensure the app is optimized for all device sizes-phones and tablets for a seamless user experience.

- Create polished and visually appealing final designs for a professional look.

Technical Contributions

- ✓ This project designs user-friendly, visually appealing interfaces for mobile applications.

- ✓ Collaborated with Mobile Architects and Developers to ensure the technical feasibility of designs and seamless integration with platform capabilities.

- ✓ Ensured designs meet usability and accessibility standards.

- ✓ Developed design guidelines and style guides for mobile applications.

- ✓ Optimized UI for fast rendering and smooth animations.

- ✓ Designed intuitive and engaging user interfaces for mobile applications (iOS and Android), aligning with brand identity and user expectations.

- ✓ Smart animate for smooth transitions and hover effects for buttons.

Project 4: Grand Caffee

Designation: UIUX Designer

Roles: Mobile App Designer

Tools: Figma

Description:

- Designed a mobile application for customers to order Coffee at Grand Caffee.

o Customers can quickly place coffee orders via the mobile application.
o Browse a variety of coffee options, with choices for size, milk type, sweeteners, etc..
o Email/SMS confirmations are sent to both the customer and the cafe.
o Pay in-app or in-person upon pickup/delivery for convenience.
o The App works on devices (Smartphones and tablets) (iOS & Android).

Hard Skills

- Use tools like Figma, Balsamiq to create wireframes and interactive prototypes.

- Design a wireframe for the app's home screen, featuring coffee menus, promotions, and a quick-order button.

- Develop a visually appealing interface with a consistent color palette, typography, and branding that aligns with Grand Coffee's identity.

- Use warm, earthy tones (browns, creams) and coffee-related imagery to create a cosy cafe vibe

- Ensure the app works seamlessly across various devices (mobile, tablet) and screen sizes.

- Design a responsive menu layout that adapts to both portrait and landscape orientations.

- Select readable fonts and design custom icons for the app

- Designed graphical elements, icons, buttons, typography, color schemes, and imagery to maintain a consistent and attractive visual style.

Technical Contributions

- ✓ Developed to design guidelines and style guides for mobile applications.

- ✓ Designed user interfaces that are visually appealing, easy to use, and consistent across different platforms.

- ✓ Designed for Android platforms, adhering to platform-specific guidelines and best practices.

- ✓ Created user flows, wireframes, and prototypes to visualise and test design concepts.

- ✓ Developed scalable and performant web applications using modern frontend frameworks

Project 5: Varun Decor

Designation: UI UX Designer

Roles: Website Designer

Tools: Figma

Description:

- VarunDecor is a comprehensive online platform dedicated to transforming spaces through innovative design solutions. Specialising in interior design, lighting design, and outdoor design, VarunDecor connects users with professional designers, curated design ideas, and a seamless design experience.

Homepage:

- Visually stunning hero section showcasing trending projects in interior, lighting, and outdoor design.
- Clear categories: Interior Design, Lighting Design, and Outdoor Design.

Design Gallery:

- Acurated collection of projects with filters for style, room type, budget, and design type (interior, lighting, outdoor).
- High-quality images with hover effects to view project details and inspire users.

Hard Skills

- Develop low-fidelity and high-fidelity wireframes to outline the website structure and user journey.

- User-Centred Design: Prioritize intuitive navigation and seamless user experiences tailored to interior, lighting, and outdoor design services.

- Advanced Figma Tools: Utilize frames, grids, constraints, and auto-layout to create scalable and consistent designs.

Technical Contributions

- ✓ Planning and designing to user interfaces for Web applications using tools such as Figma and Balsamiq.
- ✓ Ensured that the user interface is consistent with the overall brand guidelines.
- ✓ Created conceptual wire-frames, user flow diagrams and low-fidelity prototypes to communicate design concepts for discussion and testing purposes.
- ✓ Worked on this project with the latest design trends, techniques, and technologies.
- ✓ This Varun decor project works closely with front-end developers.

Project 6: WhatsApp

Designation: UI UX Designer

Roles: Mobile App Designer

Tools: Figma

Description:

- This project focuses on redesigning the WhatsApp **mobile app** using Figma, with an emphasis on its core modules: **Chats**, **Groups**, **Status**, and **Calls**.
- Create clickable transitions between screens (tapping a chat opens the conversation)
- Add smooth animations for navigating between tabs (Chats, Groups, Status, and Calls).

Hard Skills

- Developing low-fidelity and high-fidelity wireframes to map out the app's structure and user flows.

- Prioritizing user needs to create intuitive and engaging interfaces.

- Structuring content and features for easy navigation and accessibility.

- Crafting seamless interactions, such as button clicks, swipes, and transitions.

- Designing reusable components (chat bubbles, icons, buttons) for consistency.

- Leveraging Figma's auto layout for responsive and scalable designs.

- Building interactive prototypes to simulate user experiences and test functionality

Technical Contributions

- ✓ User-centered design by understanding business requirements and user feedback.
- ✓ Collaborated with the design team to develop wireframes, prototypes, and visual designs to create this app.
- ✓ Maintained the project design consistency with brand guidelines and design systems.
- ✓ Up to date with the latest Web trends, techniques, and technologies to create projects.
- ✓ Optimizing user flows and navigation for seamless and intuitive mobile experiences

Project 7: JIO

Designation: UI UX Designer

Roles: Mobile App Designer

Tools: Adobe XD

Description:

- This project focuses on redesigning. We've made MyJio easier and more fun. Our new design makes managing your mobile and Wi-Fi connections incredibly easy. Whether you're streaming content, making UPI payments, shopping, or handling your finances, everything is now more exciting and user-friendly.

Hard Skills

- Using Figma's auto layout feature for responsive and scalable designs.

- Creating low-fidelity layouts to plan the app's structure and flow.

- Building interactive prototypes to simulate user interactions and test functionality.

- Using grids to ensure alignment and consistency across screens.

- Adding subtle animations using Figma's Smart Animate.

- Understanding features like recharge plans, bill payments, data usage tracking, and customer support.

Technical Contributions

- ✓ Created in information architecture and sitemaps.
- ✓ Designing interfaces for iOS and Android applications that are visually appealing, intuitive, and user-friendly
- ✓ Maintaining design consistency across all app screens and features by using style guides and style sheets

- ✓ Created to develop user personas, user stories, and storyboards.

- ✓ Designed UI elements and tools such as a navigation menu, search box, tabs, and widgets for our digital assets.

- ✓ Prototype makes sure that design elements and user experience are consistent across all projects.

- ✓ Work within design system guidelines to ensure designs are user-friendly while remaining consistent with our design framework.

- ✓ Tested new ideas before implementing them.

- ✓ I collaborated with developers to design the UI/UX, including loyalty points, payment processing, and order management.

- ✓ Ensured that applications were fully responsive and accessible across a wide range of devices, including smartphones, tablets.

- ✓ Contributing to the entire design process from design strategy to design execution

Project 8: ZARA

Designation: UI UX Designer

Roles: Website Designer

Tools: Adobe XD

Description:

- Designing and prototyping the Zara website in Adobe XD involves creating a sleek, modern, and user-friendly interface that aligns with Zara's brand identity. Below is a detailed breakdown of the process and key elements to include.

- Zara is known for its minimalist, trendy, and high-fashion aesthetic. The design should reflect sophistication, simplicity, and elegance.

Hard Skills

- Wire framing, prototyping (Adobe XD, Balsamiq), user research, etc.

- Knowledge of creating reusable components, styles, and assets to maintain consistency across the design.

- Ability to design for multiple screen sizes (desktop, tablet, mobile) using responsive design principles.

- Ability to use Zara's brand colours (black, white, gray) effectively while maintaining contrast and accessibility.

Technical Contributions

- ✓ Created wire frames, prototypes, and high-fidelity designs for ERP software interfaces.

- ✓ Design in user flows, ensuring an intuitive navigation system within the application.

- ✓ Developed responsive and visually appealing UI components.

- ✓ Ensured that the ERP system was optimized for speed and performance.

- ✓ Basic grasp of user-centered design and design thinking.

- ✓ Creating visual imagery for websites while ensuring alignment with client branding.

- ✓ Developed and implemented UI/UX components for reuse in an SDK for other developers.

- ✓ Ensured the technical feasibility of UI/UX designs.

- ✓ Designs like logos, banners, website page layouts, App Screens, and Wireframes created.

- ✓ High-fidelity designs and interactive prototypes using Adobe XD were created.

- ✓ Troubleshoot existing web applications

- ✓ Ensure the technical feasibility of UI/UX designs.

- ✓ Tested UI elements, such as banners, CTAs, page designs, page layouts, target links, and page flows, for landing pages.

- ✓ Developed new user-facing features.

- ✓ Quick-view product modals.

Project 9: Custom Shoe Design Visualization for Nike

Designation: UI UX Designer

Roles: Website Designer

Tools: Adobe Photoshop

Description:

- To create visually stunning mock-ups and promotional materials for Nike's online shoe customization tool using Adobe Photoshop. These designs will highlight the wide range of customization options available to customers, including color combinations, material choices, and unique patterns.

Technical Contributions

- ✓ Developed brand elements, logos, and typography as per brand guidelines.
- ✓ Designed a website with a user-friendly interface.
- ✓ Designing Web page layouts in designing software and converting them into HTML pages.
- ✓ Designed detailed products, services, catalogues/Brochures, and other advertising graphics.
- ✓ Created compelling logos, designs, prints, and digital media.
- ✓ Created engaging graphics, layouts, and visual content for digital and print media, including brochures, product manuals, promotional materials, and website visuals.
- ✓ Created a wide range of graphics and layouts for product illustrations, company logos, and websites with software such as Photoshop.
- ✓ Designed promotional materials, including banners, infographics, and seasonal campaigns.
- ✓ Created to high-quality graphic designs such as brochures, logos, flyers, banners, and social media assets.
- ✓ Provided support for branding, logo design, and other visual identity elements.

Project 10: Gym Website

Tools: Adobe Photoshop

Description:

- The gym website, designed in Adobe Photoshop, features a modern, bold, and energetic layout that reflects strength, fitness, and professionalism. The design is clean and visually striking, combining high-quality imagery, strong typography, and a dynamic colour scheme.

Technical Contributions

- ✓ Used design software to create visuals, including Adobe Photoshop, Illustrator, and InDesign.
- ✓ Developed illustrations, logos, and other designs using software.
- ✓ Used the appropriate colours and layouts for each graphic.
- ✓ Worked with copywriters and marketing partners to produce the final design.
- ✓ Ensured final graphics and layouts are visually appealing and on-brand.
- ✓ Maintained an organised system for design templates and digital assets.
- ✓ Design, develop, and maintain responsive websites and web applications.
- ✓ Ensured websites are optimized for speed, scalability, and SEO.
- ✓ Developed layouts for marketing materials, including brochures and flyers.
- ✓ Used the appropriate colours and layouts for each graphic.
- ✓ Effectively used brand colours, typography, infographics, visual effects, and other design elements.
- ✓ Designed and developed web-based components in HTML5, CSS, and JavaScript from the ground up as per the provided guidelines and specifications.
- ✓ Developed UI/UX design components for websites, apps, and digital interfaces.

Project 11: QuickDrive

Language: PHP

Tools: Visual Studio Code

Description: QuickDrive makes your travel easy with a seamless car booking experience.
Book a Primary Sedan with a flexible date and time for pick-up and drop-off.
Our reliable service ensures comfort, safety, and convenience throughout your journey.
Enjoy a smooth ride every time you choose QuickDrive.

Hard skills

- PHP and object-oriented PHP

- HTML5, CSS3, JavaScript, Bootstrap, (responsive UI)

- MySQL

- Server-side validation & client-side validation

Technical Contributions

- ✓ Developed and maintained the QuickDrive car booking platform using PHP and MySQL.
- ✓ Frontend knowledge of HTML, jQuery, JavaScript
- ✓ Design and implement booking modules (car selection, pick-up & drop scheduling, contact form).
- ✓ Collaborated with designers and stakeholders to deliver responsive and user-friendly UI.
- ✓ Created and managed database structures for cars, bookings, and customer details.
- ✓ Build PHP scripts for booking forms, contact forms, and receipt generation.
- ✓ Provided ongoing support and enhancements to improve customer experience.
- ✓ Optimised performance with clean queries and caching techniques.
- ✓ Ensured responsive UI, secure data handling, and smooth user experience.

Project 12: Aanath Healthcare Centre

Language: PHP

Tools: Visual Studio Code

Description: Aanath Healthcare Centre offers an efficient doctor booking system with user-friendly modules. Patients can book appointments by selecting a doctor's name, choosing a preferred date and time, and entering their email details. Once the booking is made, the system sends an email notification to both the patient and the doctor. Doctors can then confirm or mark the appointment status as pending or not confirmed. Patients are also required to provide their mobile number and briefly describe their health problem, helping doctors prepare in advance and ensuring faster, more accurate care.

Hard skills

- PHP & MySQL for backend development and database management

- HTML, CSS, and JavaScript for responsive front-end design

- Email integration using SMTP or third-party APIs for appointment confirmation

- Server-side validation & client-side validation

Technical Contributions

- ✓ Developed and maintained the doctor booking system with date, time, and email modules.
- ✓ Ensured smooth integration of patient appointment requests with doctor confirmations.
- ✓ Implemented secure data handling for patient information, including mobile numbers and problems.
- ✓ Managed email notifications for booking, confirmation, and pending statuses.
- ✓ Collaborated with doctors and staff to update schedules and improve patient communication.
- ✓ Maintained and optimised the database for storing patient, doctor, and appointment records.
- ✓ Designed and implemented a responsive user interface for easy appointment booking.

Achievements:

Gaja Cyclon

- Providing displaced people with temporary housing and safe spaces.

- Distributing food, clean water, medicine, and other essential supplies.

Beach Clean

- I took part in a beach clean-up, working to clear litter and debris to help keep the coastline clean and protect the environment.

Tobacco Awareness

- Quit Smoking, Campaign
- Tobacco-Free Generation Initiative
- Secondhand Smoke Awareness

Liquor Awareness

- Underage Drinking Prevention Initiative
- Alcohol and Mental Health Awareness
- Sober Driving" Initiative
